# THE WILL

Once upon a time...

...the **CARISPORT** association has been helping the disabled to live a better life for 20 years through sport.

Each year a national tournament of the best football training centres takes place in order to promote CARISPORT which allots the donations as sports equipment to other associations.

These donations are not intended for only one kind of sport and aim **to facilitate access for the disabled to different sports.**

**As CARISPORT, created in 1991, will be 20 this year,** Claude Delaunay, with his experience in charitable work, has given a **new dimension to his commitment by creating the Allocation Fund.**

700 volunteers

# A COMMITMENT

## Emmanuel PETIT

A symbolic member.  
This exemplary sportsman  
today successfully  
reconverted,  
**has joined the Allocation Fund.**

*"This project is an important step toward the solidarity and the values we fight for through sport. Today each of us can contribute in our own way to build together a different vision of sport so opening new perspectives for the fans.*

*United we stand"*

EMMANUEL PETIT, World Champion 1998

# HOW?

Creation of the internet site **CARISPORT.ORG**

**It's purpose :** to collect funds by auctioning objects such as sports-shirts, accessories, balls... worn or used by well-known sportsmen or women during matches, the Olympic Games, international and national competitions... signed and authenticated.

**This multisport endeavour** will promote the most popular collective sports (football, rugby, handball, basketball...) as well as individual sports (athletics, cycling, swimming...)

**The principle :** the sportsman or woman donates his items which are collected by a **network of exclusive CARISPORT ambassadors** and authenticated officially.

Once online, they are **auctioned** according to specific rules (price, duration...) and once purchased sent to the buyers in the safest conditions.

Partner, the partners who will join us

# PROJECTS

Today's **target** is bolder and aims to **finance nationwide projects**, granting access to sport and/or basic leisure activities to the disabled.

## The first project for 2012

is to make available to the biggest number of people the **"equimobile all terrain", the Cariâne**, Offering freedom of access to the basic leisure activity of hiking to those who use it.

This will be done through the nationwide hiking club network in partnership with the **International Rotary Club**.

## Triple aims :

- access to a basic popular family leisure activity : **hiking**.
- gathering together the valid and disabled **for more communication and solidarity**.
- a genuine environment : **nature, donkey and man in harmony**.

## The second project for 2012

In 2005 CARISPORT designed a **special chair for paragliding**.

After this first experiment, a **new prototype for parasailing was born in 2011**.

The aim is for a maximum number of nautical clubs to be equipped **to enable the disabled to discover the joy of flying** without any risk.
